

ABOUT ME

My name is Andrzej Dubiel. I am a front-end web developer and UI/UX designer with almost 6 years of hands-on experience. I have a true passion for web development and human interaction. I love breaking down complex ideas and turning them into simple and creative solutions. Over the course of my career, I've worked at a variety of companies, from startups to marketing agencies. Having a wide range of experience has given me an opportunity to explore new technologies and work with brilliant human beings.

WORK EXPERIENCE & SIDE PROJECTS

- Truest.pl
Freelancer / 2015 -
Based in Warsaw, Truest is one of the biggest advertising agencies in Poland. I am responsible for front-end web development and product design.
- Hashtag.info
Founder, Designer & Developer / 2014 -
Founded, designed and developed a hashtag-powered social media service based in Poland. This SaaS application uses hashtags to search for and collect public social media within seconds of being posted to networks like Twitter and Facebook. Currently in beta.
- Wybierzsport.pl
Designer & Developer / 2014 -
Designed and developed a Polish website that helps people find great local sport clubs and venues based on unsolicited online reviews. Still in development.
- Custi
Founder, Designer & Developer / 2014 -
Custi is a customised muesli. I partnered up with the biggest bakery in Poland, in order to make a unique e-commerce platform where people can create their own granola bars and muesli mixes. Project is on hold at the moment.
- Thrive
Freelancer / 2013 - 2014
Thrive is a start-up company based in Pittsburgh, PA. Their product monitors, measures, and influences individuals and teams through custom programs. I designed and developed company's website and also contributed in creating the user experience for their mobile app.
- MARC USA
Interactive Developer / 2013 - 2014
Based in Pittsburgh, PA, MARC USA is a national full-service integrated marketing communications agency known for creating game-changing business solutions through big ideas, insight and the creative application of new technology. I was exposed to agency product lifecycle, from initial design, through user experience architecture to web development, and quality assurance. In addition, I was involved in numerous marketing and advertising strategies. Clients included Rite Aid and Payless.
- Yellow Bridge Interactive
Front-End Developer / 2012 - 2013
Yellow Bridge Interactive specializes in website design and development. From small custom websites to larger corporate sites featuring robust CMS applications. I converted complex Photoshop compositions into semantic and standard-compliant HTML/CSS/JS websites for businesses. By redesigning the company's website, I increased company's conversion rate by 200%. I managed project development through version control systems like Github and Subversion.
- UPMC
Web Developer / 2011 - 2012
I was a lead web developer for major clinical research programs in nationally ranked health care institution. I designed a variety of concepts for web and developed department websites from scratch.
- Fireman Creative
Web Developer Intern / 2010 - 2011
I assisted the PHP developer in planning and developing web applications for the biggest real-estate companies in Pittsburgh. Development utilized key PHP frameworks, like CodeIgniter. I was exposed to full life-cycle application development and maintenance. The development process included MVC architecture and Git version control.
- Plywanie.net
Founder, Administrator / 2003 - 2010
As a 15 year old, I founded the most popular swim website in Poland. As for now, the website reaches 250k unique visitors weekly and is ranked #1 in Google and Bing.

EDUCATION

University of Pittsburgh
BS, Information Science
2007 - 2011, GPA 3.4
